

NEPHRO^{pro}

For the screening of Nephropathies

4bases NEPHRO pro is a **CE-IVD** kit, a comprehensive genetic solution designed to support the diagnosis of hereditary kidney disorders. It is specifically developed for the evaluation of nephrotic syndromes, cystic kidney diseases, tubular and glomerular dysfunctions, and for genetic assessment in kidney transplantation, enabling the detection of a wide range of **clinically relevant** genetic variants.

By identifying pathogenic variants in affected individuals, at-risk family members, or transplant candidates, Nephro pro kit aids in early diagnosis, personalized management, transplant risk stratification, and genetic counselling.

The kit is validated for germline analysis (SNPs, indels, CNVs) of DNA extracted from blood or body tissues (fresh, frozen, etc.) samples.

NEPHRO pro is a kit for the analysis of 92 genes

NEPHRO_{pro}

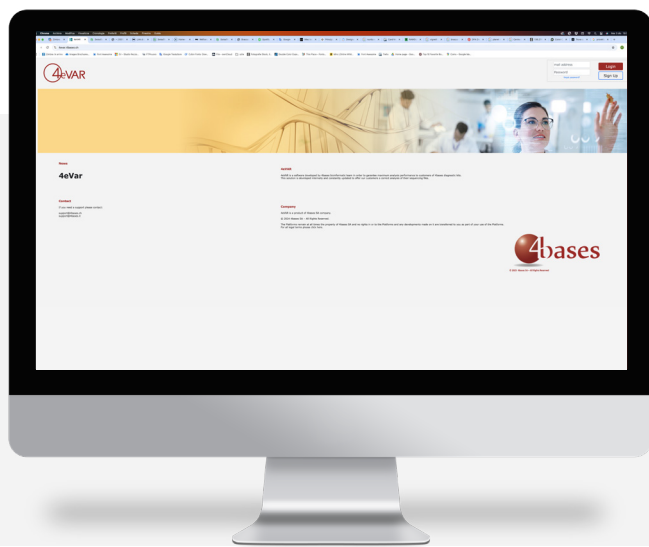

For the screening of Nephropathies

Specifications

Sample type	DNA extracted from tissues, blood or body fluids
Input	Minimum of 50 ng DNA per sample
Panel size	About 255 Kb
Variant called	SNPS, indels, CNVs
Instrument Type	Illumina, MGI, Oxford Nanopore Technologies, Ion Torrent, Element Biosciences
Data Analysis	4eVAR
Automation version	Customizable

Cod. kit

Product	Cod.	Tests number
NEPHRO pro	Series C3170-16	16
NEPHRO pro	Series C3170-96	96

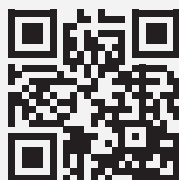

4eVAR: Comprehensive output files for analysis and reporting

- Quality metrics
- Alignment
- CNVs status
- Full variant table
- Genotype
- Coverage
- Customizable report

Data Analysis

Product	Cod.	Tests number
4eVAR	Series A6060-C3170-16	16
4eVAR	Series A6060-C3170-96	96
